

SURYA PRAMANIK

Software Developer | QA & Backend

Kolkata, India (open to remote) • 6295771697 • leosuryaof7@gmail.com • github.com/isurya7 • LinkedIn

SUMMARY

Backend-focused developer with 3 years of Python experience who ships and debugs live web applications (Django, PostgreSQL, REST APIs). Built and deployed Trivasta, a live travel platform with real users, payments, and real-time WebSocket features, which required careful end-to-end testing of booking and payment flows. Seeking a QA Engineer Intern role to deepen test automation and quality engineering skills, with a developer's understanding of how bugs actually occur in code.

SKILLS

Testing & QA: Manual functional, integration and regression testing; API testing (Postman); bug reproduction and documentation; debugging (Python, Django); test case design

In progress: Automated testing with pytest; CI with GitHub Actions; Playwright/Selenium basics

Languages: Python, JavaScript

Backend & Frameworks: Django, Django REST Framework, Django Channels (WebSockets), Node.js

Databases: PostgreSQL, MySQL (basic)

APIs & Integrations: RESTful APIs, OAuth 2.0, Gmail API, Payment Gateway, LLM API integration

Tools: Git, GitHub, Postman

PROJECTS

Trivasta: AI-Powered Travel Planning & Booking Platform (Live) | 2025 – Present

Django, Python, PostgreSQL, Django Channels, Payment Gateway API, LLM API

- Built and deployed a live platform (trivasta.in) with 29+ active users and an onboarded agency partner
- Tested and debugged end-to-end booking and payment flows, covering successful payments, failed transactions and repeat submissions
- Verified real-time seat/slot availability across multiple simultaneous users using Django Channels and WebSockets
- Used Postman to test and validate REST API endpoints and request/response behavior
- Designed and maintained the PostgreSQL schema for users, trips, bookings and transactions
- Integrated an LLM API to generate personalized trip itineraries
- Currently adding pytest tests and a GitHub Actions CI pipeline to the booking and payment modules

Live: trivasta.in | Repo: github.com/isurya7/trivasta

Zentry: Productivity & Social Web Application (In Development) | 2025 – Present

Django, Python, Gmail API, OAuth 2.0, PostgreSQL

- Implemented Gmail API integration to surface unread and important emails
- Built secure authentication using OAuth 2.0 and tested the login and token flows

WORK EXPERIENCE

Junior Developer Intern, Skill Vertex | June 2023 – August 2023 (Remote)

- Worked on web development tasks using JavaScript, PHP and relational databases
- Collaborated remotely with mentors and team members to deliver assigned modules on time
- Assisted in backend logic implementation and database handling
- Awarded a Letter of Recommendation and Certificate of Completion for strong performance

FREELANCE

Web Developer | 2024 – 2025

- **Travelthirst** (travelthirst.in): designed, delivered and deployed a multi-page website for a travel agency, handling requirements, revisions and client feedback independently
- **Saidabad Ujjal Sangha** (saidabadujjalsangha.com): designed and delivered a multi-page website for a local football club

EDUCATION

Bachelor of Computer Science and Engineering | June 2024 – June 2027

Techno India University, Specialization in Advanced Computer Engineering

Diploma in Computer Science and Technology | Sept 2021 – March 2024

Berhampore Polytechnic College

AVAILABILITY

Based in India, available for a 4-month remote internship alongside my degree.
